Subject index

Abstracts
  The Renal Association, May 16, 1973, 242
Acetylcholine
  relationship between proximal sodium reabsorption and excretion of calcium, magnesium and phosphate, 369
Acute renal failure
  computer-assisted blood background substraction renography (abstr.), 242
  diagnosis and prognosis in bilateral renal cortical necrosis, 390
  renal artery occlusion in rat, 377
Aldosterone
  dynamic studies in anephric man, 289
  metabolism in chronic renal failure and anephric man, 280
Alport's syndrome
  hereditary chronic nephritis, 216
Amphotericin B
  cholesterol pores in lipid membranes, 377
Anesthesia
  renin release in rats, 273
Announcements 70, 174, 244, 299, 431
Arterial occlusion
  effects on kidney function in rat, 377
Arteriography
  in cortical necrosis, 390
Autoregulation
  uncoupling of GFR and blood flow during renal vasodilation, 12

Bacterial endocarditis
  in regularly dialyzed patients, 407
Balance
  glomerulotubular: history of a name, 236
Bartter's syndrome
  a morphological study (abstr.), 242
Blood flow
  intrarenal distribution during renal venous pressure elevation, 259
  uncoupling of, and renal vasodilation, 12
Blood volume
  extracorporeal, in coil dialyzers, 239
Bone
  and collagen metabolism and uremia, 105
  features of renal osteodystrophy, 128
  high calcium carbonate intake on bone disease in hemodialysis patients, 146
  parathyroidectomy in treatment of secondary hyperparathyroidism, 168
  phosphate depletion and high dialysate calcium in control of renal osteodystrophy, 154
  skeletal abnormalities in chronic renal insufficiency, 116
  treatment of osteodystrophy with calciferol and steroids, 161
Bradykinin
  proximal sodium reabsorption and excretion of calcium, magnesium and phosphate, 369
Brain
  effects of hemodialysis on brain water and electrolytes, 177

Calciferol
  calcium homeostasis and kidney as endocrine organ, 80
  treatment of renal osteodystrophy, 161
Calcification
  of soft tissue in uremia, 229
Calcium
  collagen metabolism, uremia and bone, 105
  dissordered divalent ion metabolism in kidney disease, 73
  features of renal osteodystrophy, 128
  high dialysate calcium and control of renal osteodystrophy, 154
  high intake and bone disease in hemodialysis patients, 146
  homeostasis and kidney as an endocrine organ, 80
  hyperparathyroidism and renal failure, 89
  intestinal absorption of, and effect of renal insufficiency, 96
  proximal sodium reabsorption and excretion of calcium, 369
  skeletal abnormalities in chronic renal insufficiency, 116
  soft tissue calcification in uremia, 229
  treatment of osteodystrophy with calciferol and steroids, 161
Calcium phosphate
  effect of diphosphonate on crystallization of, 401
Carbohydrate metabolism
  effect in dogs of acute uremia on, 267
Central nervous system
  hemodialysis and effect on brain water and electrolyte metabolism 177
Chloride transport
  effect of ethacrynic acid on limb of Henle's loop, 301
  effect of mersalyl on limb of Henle's loop, 245
Cholesterol
  amphotericin B-cholesterol pores in lipid membranes, 377
Chronic renal failure
  oxalosis in, 61
Coil dialyzers
  blood volume in, 239
Collagen
  collagen metabolism, uremia and bone, 105

Colloid osmotic gradient
fluid absorption in absence of, 6
Compensatory hypertrophy
after unilateral ureteral obstruction, 22
Complement
studies in acute glomerulonephritis (abstr.), 243
Concentrating ability
in sheep on high and low protein diets, 188
Cortical necrosis
diagnosis and prognosis, 390
Crystallization
effect of diphosphonate on calcium phosphate crystallization, 401

Dialysis
bacterial endocarditis in patients on, 407
dynamic studies of aldosterone in anephric man, 289
effect on brain water and electrolyte metabolism, 177
endotoxemia in febrile reactions during, 57
extracorporeal blood volume in coil dialyzers, 239
high calcium carbonate intake on bone disease in patients on, 146
metabolism of aldosterone in chronic renal failure and anephric man, 280
phosphate depletion and high dialysate calcium in control of renal osteodystrophy, 154
potassium deficiency in chronic renal failure, 423
potassium removal with, 67
skeletal abnormalities in chronic renal insufficiency, 116
Dialysis disequilibrium syndrome
brain water and electrolyte metabolism in, 177
Diphosphonate
effect on calcium phosphate crystallization in urine, 401
Diuretic agents
effect of ethacrynic acid on limb of Henle's loop, 301
effect of mersalyl on limb of Henle's loop, 245
Divalent ions in renal failure, Symposium on
calcium homeostasis and kidney as an endocrine organ, 80
collagen metabolism, uremia and bone, 105
disordered metabolism in kidney disease, 73
effect of high calcium carbonate intake on bone disease, 146
features of renal osteodystrophy, 128
hyperparathyroidism and renal failure, 89
intestinal absorption of calcium and renal insufficiency, 96
introduction, 71
phosphate depletion and high dialysate calcium in control of dialytic renal osteodystrophy, 154
phosphorus restriction in prevention of secondary hyperparathyroidism, 141
skeletal abnormalities in chronic renal insufficiency, 116
treatment of renal osteodystrophy with calciferol and steroids, 161

Editorial
chronic lead nephropathy, 1
focal glomerular sclerosis, 355

Electrical resistance
effects of peritubular oncotic pressure on rat proximal tubule, 28
Electron microscopy
hereditary chronic nephritis, 216
Endocarditis
in regularly dialyzed patients, 407
Endotoxemia
in febrile reactions during hemodialysis, 57
Ethacrynic acid
effect on limb of Henle's loop, 301
Extracellular volume expansion
relationship between proximal sodium reabsorption and excretion of calcium, magnesium and phosphate, 369

Fever
endotoxemia during hemodialysis, 57
Fibrinolysis
effect on isolated glomeruli, 350
Filtration rate
autoregulation during renal vasodilation, 12
effect of control of hypertension on GFR of patients with severe hypertension (abstr.), 242
measurement of, using ^{125}I-iothalamate, 346
Fluid absorption
by proximal tubules in absence of a colloid osmotic gradient, 6
effects of peritubular oncotic pressure on proximal tubule electrical resistance, 28

Glomerular filtration rate
as affected by high and low protein diets in sheep, 188
as affected by control of hypertension in patients with severe hypertension (abstr.), 242
measurement of, using ^{125}I-iothalamate, 346
renal vasodilation and filtration rate autoregulation, 12
Glomerular sclerosis focal, 355
Glomerular ultrastructure
hereditary chronic nephritis, 216
Glomerulonephritis
complement studies in (abstr.), 243
focal glomerular sclerosis, 355
hereditary chronic nephritis, 216
membranous: clinical course and morphology, 36
Glomerulotubular balance
history of a name, 236
Glomerulus
assessment of fibrinolysis on, 350
Glucose excretion
effect on, in sheep on high and low protein diets, 188
Glucose metabolism
effect in dogs of acute uremia on, 267

Heart failure
sodium and water retention in rats with, 309
Hemodialysis
bacterial endocarditis in regularly dialyzed patients, 407
dynamics of aldosterone metabolism in patients on, 259
effects on brain water and electrolyte metabolism, 177
endotoxemia in febrile reactions during, 57

Hemodialysis—(*contd.*)
extracorporeal blood volume in coil dialyzers, 239
high calcium carbonate on bone disease in patients on, 146
metabolism of aldosterone in chronic renal failure and anephric man, 280
phosphate depletion and high dialysate calcium in control of renal osteodystrophy, 154
potassium deficiency in chronic renal failure, 423
skeletal abnormalities in chronic renal insufficiency, 116
Hemodynamics
autoregulation, 12
during renal venous pressure elevation, 259
Henle's loop
effect of ethacrynic acid on limb of, 301
effect of mersalyl on limb of, 245
membrane characteristics regulating potassium transport, 326
sodium and water retention in rats with heart failure, 309
Hereditary nephritis
progressive and nonprogressive, 216
Historical perspective
glomerulotubular balance, 236
Hyperoncotic albumin expansion
relationship between proximal sodium reabsorption and excretion of calcium, magnesium and phosphate, 369
Hyperparathyroidism
and renal failure, 89
parathyroidectomy in the treatment of, 168
phosphorus restriction in prevention of, in chronic renal disease, 141
Hypertension
GFR in patients with severe hypertension (abstr.), 242

Idiogenic osmoles
hemodialysis, effects on brain water and electrolyte metabolism, 177
Insulin
effect of uremia on carbohydrate metabolism, 267
Intercellular spaces
passive water absorption and transepithelial movement of extracellular solutes in rat intestine, 362
Iothalamate
for measuring GFR, 346
Ischemia
effect on renal function, 377

Lead
chronic lead nephropathy, 1
Leucocytes
sodium efflux from leucocytes in renal failure (abstr.), 242
Lipid membranes
amphotericin B-cholesterol pores in, 337

Magnesium
disordered divalent ion metabolism in kidney disease, 73
excretion of, and proximal sodium reabsorption, 369
soft tissue calcification in uremia, 229
Membrane permeability
effect of passive water absorption on transepithelial movement of extracellular solutes in rat intestine, 362
Membranous glomerulonephritis
clinical course and morphology, 36
Mercury intoxication
as a cause of renal lesions (French), 208
Mersalyl
effect on limb of Henle's loop, 245
Methylurea
effects of high and low protein diets in sheep, 188
Micropuncture
effects of KCl infusion on proximal tubular function in rats, 318
effects of renal artery occlusion on kidney function in rat, 377
relationship between sodium reabsorption and excretion of calcium, magnesium and phosphate, 369
sodium and water retention in rats with heart failure, 309
sodium-free fluid reabsorption in *Necturus* kidney, 252

Nephrotic syndrome
hereditary chronic nephritis, 216

Obstructive uropathy
compensatory renal growth after, 22
Oncotic pressure
effects on rat proximal tubule electrical resistance, 28
fluid absorption in absence of a colloid osmotic gradient, 6
Organomercurial diuretics
effect of mersalyl on limb of Henle's loop, 245
Osmotic flow
passive water absorption and transepithelial movement of extracellular sollutes in rat intestine, 362
Osteodystrophy
features of renal osteodystrophy, 128
high calcium carbonate intake and patients on hemodialysis, 146
in chronic renal insufficiency, 116
parathyroidectomy in treatment of secondary renal hyperparathyroidism, 168
phosphate depletion and high dialysate calcium in control of, 154
skeletal abnormalities in chronic renal insufficiency, 116
treatment with calciferol and steroids, 161
Osteomyelitis
bacterial endocarditis in regularly dialyzed patients, 407
Oxalosis
in chronic renal failure, 61

p-Aminohippuric acid excretion
effect on, in sheep on high and low protein diets, 188
Parathyroidectomy
in treatment of secondary renal hyperparathyroidism, 168

Parathyroid hormone
calcium homeostasis and kidney as endocrine organ, 80
hyperparathyroidism and renal failure, 89
phosphorus restriction and prevention of hyperparathyroidism, 141
relationship between sodium reabsorption and excretion of calcium, magnesium and phosphate, 369
Peritoneal dialysis
potassium removal with, 67
Phosphorus
depletion, in control of dialytic renal osteodystrophy, 154
relationship between sodium reabsorption and excretion of, 369
restriction, in prevention of secondary hyperparathyroidism in chronic renal disease, 141
Pores
amphotericin B-cholesterol pores in lipid membranes, 377
Potassium
deficiency in chronic renal failure, 423
effects on proximal tubular function in rats, 318
removal with peritoneal dialysis, 67
transport out of limb of Henle, 326
Potassium deficiency
effects of KCl infusions on proximal tubular function in rats, 318
in chronic renal failure, 423
Prostaglandin
relationship between sodium reabsorption and excretion of calcium, magnesium and phosphate, 369
Protein
effect in diet on sheep renal function and metabolism, 188
fluid absorption in absence of colloid osmotic gradient, 6
Proteinuria
variation in selectivity of (abstr.), 242
Proximal tubule
effects of peritubular oncotic pressure on electrical resistance in, 28
fluid absorption in absence of colloid osmotic gradient, 6
function in rats after KCl infusion, 318
relationship between proximal sodium reabsorption and excretion of calcium, magnesium and phosphate, 369
sodium-free fluid reabsorption in *Necturus* kidney, 252
Pyelonephritis
effect in the rat of immunization on (abstr.), 242

Renal blood flow
autoregulation during vasodilation, 12
diagnosis and prognosis in bilateral renal cortical necrosis, 390
distribution during renal venous pressure elevation, 259
Renin
Bartter's syndrome: a morphological study (abstr.), 242
in anephric man, 289
release during renal venous pressure elevation, 259
release in anethetized rats, 273
Renin secretion
in bilateral renal cortical necrosis, 390
Renography
computer-assisted blood background substraction renography in acute renal failure (abstr.), 242

Sclerosis
focal glomerular, 355
Sheep
effects of high and low protein diets on renal function and metabolism, 188
Sodium
effect in rat intestine of passive water absorption on transepithelial movement of, 362
efflux from the leucocyte in renal failure (abstr.), 242
Sodium reabsorption
effects of KCl infusions on proximal tubular function in rats, 318
fluid absorption by proximal tubular function in the absence of a colloid osmotic gradient, 6
in rats with heart failure, 309
relationship to excretion of calcium, magnesium and phosphate, 369
sodium-free fluid reabsorption in *Necturus* kidney, 252
Split-droplet
sodium-free fluid reabsorption in *Necturus* kidney, 252

Urate
renal excretion in Wilson's disease, 331
Urea
effects of high and low protein diets in sheep, 188
Urea-cycle enzymes
effect on, in sheep on high and low protein diets, 188
Uremia
brain water and electrolyte metabolism, 177
collagen metabolism and bone, 105
disordered divalent ion metabolism in, 73
dynamic studies of aldosterone in anephric man, 289
effect of carbohydrate metabolism in dogs, 267
features of renal osteodystrophy, 128
hyperparathyroidism and renal failure, 89
influence of high calcium carbonate intake on bone disease in dialysis patients, 146
intestinal absorption of calcium and renal insufficiency, 96
metabolism of aldosterone in, 280
nature of soft tissue calcification in, 229
parathyroidectomy in secondary renal hyperparathyroidism, 168
phosphate depletion and high dialysate calcium in control of renal osteodystrophy, 154
phosphorus restriction in prevention of secondary hyperparathyroidism in, 141
potassium deficiency in, 423
skeletal abnormalities in, 116
sodium efflux from the leucocyte in (abstr.), 242
treatment of renal osteodystrophy with calciferol and steroids, 161
Ureteral obstruction
compensatory renal growth after, 22
Urolithiasis
effect of diphosphonate on calcium phosphate crystallization, 401

Vasodilation
and uncoupling of blood flow and filtration rate autoregulation, 12
Venous pressure
blood flow and renin release during elevation of, 259
Vitamin D
intestinal absorption of calcium and effect of renal insufficiency, 96
kidney as endocrine organ in calcium homeostasis, 80
treatment of renal osteodystrophy, 161

Water absorption
effect on transepithelial movement of extracellular solutes in rat intestine, 362
Wilson's disease
renal urate excretion in, 331

Xenon
intrarenal distribution of blood flow during renal venous pressure elevation, 259

Contents for Volume 4

July—December, 1973

Number 1, July 1973

Chronic lead nephropathy. *Bryan T. Emmerson* . . 1
Fluid absorption by proximal tubules in the absence of a colloid osmotic gradient. *M. Horster, M. Burg, D. Potts and J. Orloff* 6
Renal vasodilation and uncoupling of blood flow and filtration rate autoregulation. *Philip G. Baer and L. Gabriel Navar* 12
Compensatory renal growth after unilateral ureteral obstruction. *David F. Paulson and Elwin E. Fraley* 22
Effects of peritubular oncotic pressure on rat proximal tuble electrical resistance. *John F. Seely* 28
Membranous glomerulonephritis: Long-term serial observations on clinical course and morphology. *Wilbur A. Franklin, Robert B. Jennings and David P. Earle* 36
Endotoxemia in febrile reactions during hemodialysis. *Leopoldo Raij, Fred L. Shapiro and Alfred F. Michael* 57
Oxalosis as a complication of chronic renal failure. *William R. Salyer and David Keren* 61
Potassium removal with peritoneal dialysis. *Stephen T. Brown, Daniel J. Ahearn and Karl D. Nolph* . . . 67
Announcements 70

Number 2, August 1973

Symposium on Divalent Ions in Renal Failure. Introduction. *Shaul G. Massry* 71
Disordered divalent ion metabolism in kidney disease: Comments on pathogensis and treatment. *Charles R. Kleeman and Ori S. Better* 73
The kidney as an endocrine organ involved in calcium homeostasis. *Hector F. DeLuca* 80
Hyperparathyroidism and renal failure. *Claude D. Arnaud* 89
Intestinal absorption of calcium and the effect of renal insufficiency. *Jack W. Coburn, David L. Hartenbower and Shaul G. Massry* 96
Collagen metabolism, uremia and bone. *Louis V. Avioli* 105
Skeletal abnormalities in chronic renal insufficiency before and during matinenance hemodialysis. *E. Ritz, B. Krempien, O. Mehls and H. Malluche*. 116
Some biochemical, histological, radiological and clinical features of renal osteodystrophy. *J. B. Eastwood, Ph. J. Bordier and H. E. de Wardener* . . 128
The role of phosphorus restriction in the prevention of secondary hyperparathyroidism in chronic renal disease. *Eduardo Slatopolsky and Neal S. Bricker*. 141
The influence of a high calcium carbonate intake on bone disease in patients undergoing hemodialysis. *Alain Meyrier, Jean Marsac and Gabriel Richet* . 146
Role of phosphate depletion and high dialysate calcium in controlling dialytic renal osteodystrophy. *Ralph S. Goldsmith and William J. Johnson* . . 154
Treatment of renal osteodystrophy with calciferol (vitamin D) and related steroids. *Arnold S. Brickman and Anthony W. Norman* 161
Parathyroidectomy in the treatment of secondary renal hyperparathyroidism. *Chisholm S. Ogg* . . 168
Announcements 174

Number 3, September 1973

Brain water and electrolyte metabolism in uremia: Effects of slow and rapid hemodialysis. *Allen I. Arieff, Shaul G. Massry, Alberto Barrientos and Charles R. Kleeman* 177
Effects of high and low protein diets on sheep renal function and metabolism. *Lawrence Rabinowitz, Robert A. Gunther, Ellen S. Shoji, Richard A. Freedland and Ernest H. Avery*. 188
Apport du micro-analyseur à sonde électronique dans l'étude des lésions rénales provoquées par l'intoxication aiguë mercurielle. *Bernadette Nabarra, Pierre Galle, Isabelle Andrianarison and Evelyne Lebois* 208
Progressive and nonprogressive hereditary chronic nephritis. *Jean-Pierre Grünfeld, Etienne P. Bois and Nicole Hinglais* 216
Nature of soft tissue calcification in uremia. *Sebastian R. Contiguglia, Allen C. Alfrey, Nancy L. Miller, Donald E. Runnells and Racquel Z. LeGeros* . . . 229
Glomerulotubular balance: History of a name. *Laurence G. Wesson* 236
Extracorporeal blood volume in coil dialyzers. *R.J. Nothum, J.M. Schmidtlein, K.D. Nolph and J.F. Maher* 239
Abstracts, The Renal Association, May 16, 1973 . . 242
Announcements 244

Number 4, October 1973

Effect of mersalyl on the thick ascending limb of Henle's loop. *Maurice Burg and Nordica Green* . 245
Sodium-free fluid reabsorption in *Necturus* kidney perfused with sodium-free media. *Dominique Villey and Takis Anagnostopoulos* 252
Intrarenal distribution of blood flow and renin release during renal venous pressure elevation. *Taketoshi Kishimoto, Masanobu Maekawa, Youichi Abe and Kenjiro Yamamoto* 259
Effect of acute uremia on various aspects of carbohydrate metabolism in dogs. *Robert S. Swenson, Daniel T. Peterson, Michael Eshleman and Gerald M. Reaven* 267
Renin release in anesthetized rats. *Paul C. Churchill, Monique C. Churchill and Franklin D. McDonald* 273
Studies on the metabolism of aldosterone in chronic renal failure and anephric man. *Gordon H. Williams, George L. Bailey, Constantine L. Hampers, David P. Lauler, John P. Merrill, Richard H. Underwood, John R. Blair-West, John P. Coghlan, Derek A. Denton, Bruce A. Scoggins and R. Douglas Wright* 280
Dynamic studies of aldosterone in anephric man. *Peter Weidmann, Richard Horton, Morton H. Maxwell, Stanley S. Franklin and Marshall Fichman* . 289
Announcements 299

Number 5, November 1973

Effect of ethacrynic acid on the thick ascending limb of Henle's loop. *Maurice Burg and Nordica Green*. . 301
Mechanism of sodium and water retention in rats with experimental heart failure. *Klaus O. Stumpe, Helga Sölle, Herbert Klein and Friedrich Krück* 309
Effects of KCl infusions on proximal tubular function in normal and potassium depleted rats. *David Z. Levine, Teena Walker and Lorena A. Nash* . . . 318
Membrane characteristics regulating potassium transport out of the isolated perfused descending limb of Henle. *Antonio S. Rocha and Juha P. Kokko* . 326
Renal urate excretion in patients with Wilson's disease. *David M. Wilson and Norman P. Goldstein* . . . 331
On the anatomy of amphotericin B-cholesterol pores in lipid membranes. *Thomas E. Andreoli* 337
Measurement of glomerular filtration rate utilizing a single subcutaneous injection of ^{125}I-iothalamate. *Arnold H. Israelit, Dewey L. Long, Martin G. White and Alan R. Hull* 346
Quantitative assessment of fibrinolysis on isolated glomeruli. *Jean-Daniel Sraer, Johan Boelaert, Odile Mimoune, Liliane Morel-Maroger and Helena Hornych* 350
Announcements 353

Number 6, December 1973

Focal glomerular sclerosis. *Renée Habib* 355
Effect of passive water absorption on transepithelial movement of extracellular solutes in rat intestine. *Meyer D. Lifschitz, Jorge A. Garcia and Laurence E. Earley* 362
Relationship between proximal sodium reabsorption and excretion of calcium, magnesium and phosphate. *Edward G. Schneider, Jack W. Strandhoy, Lynn R. Willis and Franklyn G. Knox* 369
Effects of renal artery occlusion on kidney function in the rat. *George A. Tanner, Kathy L. Sloan and Samaisukh Sophasan* 377
Diagnostic procedures and long-term prognosis in bilateral renal cortical necrosis. *Dieter Kleinknecht, Jean-Pierre Grünfeld, Pedro Cia Gomez, Jean-François Moreau and Romano Garcia-Torres* . . 390
The effect of diphosphonate on calcium phosphate crystallization in urine *in vitro*. *Masahiro Ohata and Charles Y.C. Pak* 401
Bacterial endocarditis in regularly dialyzed patients. *Arthur Leonard, Leopoldo Raij and Fred L. Shapiro* 407
Potassium deficiency in chronic renal failure. *Gordon L. Bilbrey, Norman W. Carter, Martin G. White, John F. Schilling and James P. Knochel* 423
Announcements 431
Indexes 433
